

Day 13 Homework

1. $x^{\frac{1}{3}} = 2$

2. $x^{\frac{3}{2}} = 27$

3. $x^{\frac{4}{3}} = 625$

4. $(3x)^{\frac{1}{4}} = 3$

5. $(2x + 4)^{\frac{1}{6}} = 2$

6. $2 = -2x^{\frac{1}{5}} + 6$

7. $-8 - 2(62 - x)^{\frac{3}{2}} = -1032$

8. $-6 + (2x - 42)^{\frac{3}{4}} = 2$
